

## Essential Skills - Lesson 2

Please review the following videos on the computer events of history timeline before the Essential Skills class.

<https://www.youtube.com/watch?v=pBiVyEfZVUU>

<https://www.youtube.com/watch?v=HRi1BHjID3o>

Have any questions about the videos from today's lesson ready to ask in class. We will also continue our primer with Microsoft PowerPoint to include Pictures, Transitions, and Animations. I have included another exercise titled **"PowerPoint – Exercise 2"** for you to complete and ensure an understanding of today's lesson.

Add to your presentation and include a technical briefing on any three (3) historical computing events or persons who advanced the field of computing.

Your slides for this part of the presentation should include at least:

- When did the event/accomplishment happen?
- Why was the event or person important?
- What happened, or what did they do?
- One interesting fact about the person or event.

See you at 10.
