Essential Skills – Lesson 3

Please review the following videos on computer catastrophes before the Essential Skills class.

https://listverse.com/2019/07/30/top-10-most-catastrophic-computer-failures-in-history/
https://www.youtube.com/watch?v=AGI371ht1N8
https://www.youtube.com/watch?v=7UaPL5PGywo

Have any questions on the videos presented in todays lesson ready for class. Today I also want to look at things that you can do to create a more powerful presentation for your audience. Look at the following video.

https://www.youtube.com/watch?v=BuB7IhWZnJs&t=163s

As the previous videos, have any questions about this video ready to ask in class.

Add to your presentation and include a technical briefing on any three failures in the computer industry as presented in the videos.

Your slides for this part of the presentation should include at least:

- What was the event or person associated with the failure?
- What was the damage?
- How could it have been prevented / fixed?
- One interesting fact.

See you at 10.
